

## FOR IMMEDIATE RELEASE

### Segmented Turning... A learning experience A "How To" DVD that exposes Segmented Turning as fun activity

Arroyo Grande, CA – May 7, 2007 – Driven to propagating the religion of segmented projects, SegmentedTurning.com announces the release of its newest development effort. This new release is a step-by-step compendium of all the processes needed to create and craft a successful segmented turning.

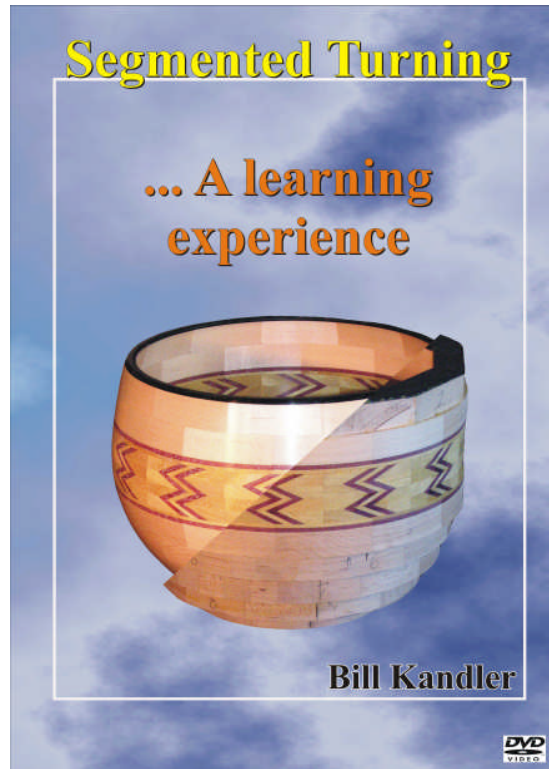

As you follow Bill Kandler during the course of the 120 minute DVD, you will learn about:

- Project Design (Segmented Project Planner)
- Feature Ring Construction
- Material Selection & Preparation
- Segment Cutting
- Segment Glueing
- Ring Flattening
- Mounting on the Lathe
- Stacking & Turning Subsequent Layers
- Finishing

According to Bill Kandler, creator of the Segmented Project Planner and an accomplished segmented turner, "This project was a significant learning experience from beginning to end. Not only at the table saw and the lathe, but the whole process of video creation and editing as well."

This new video is priced at \$24.95 and will be available for on line purchase at <http://www.segmentedturning.com> as well as from other retail outlets. Dealers/commercial inquiries welcome.
