

FOR IMMEDIATE RELEASE

Segmented Project Planner Joins the 21st Century! SPP version 2.6

Arroyo Grande, CA – February 21, 2008 –SegmentedTurning.com announces the newest release of its software design tool for segmented wood turners.

Specifically included are:

- Automatic downloading of program updates. It's no longer necessary to remember to visit our site to stay current.
- Segment painting improved by requiring fewer mouse clicks for color revisions.
- Incorporated global segment color changing, making it easier to make significant color changes to an existing design.
- Modified Segment Designer to preserve color assignments across changes in the number of rows or columns. This means less pain and strain in developing new mosaic layouts.

According to Bill Kandler, creator of the software and an accomplished segmented turner, “These changes will make segmented project design even easier and faster and enable Segmented Project Planner users to painlessly stay current on program versions.”

As always, this new release is free to existing program customers via a download from our web site (<http://www.segmentedturning.com/upgrdspp.exe>) and pricing remains at \$39.95 for the installation CD.
