FOR IMMEDIATE RELEASE

Segmented Project Planner Supports Tracing!
SPP version 3.2

Arroyo Grande, CA – May 10, 2011 –SegmentedTurning.com announces another set of improvements in its newest release of its software design tool for segmented wood turners.

Specifically included are:
- Project report is now tailorable to make it better fit user needs and to reduce errors in the shop. Column headers, content and column colors can be changed for individual projects.
- A few small error fixes.

According to Bill Kandler, creator of the software and an accomplished segmented turner, "These changes improve the project report by making it better correspond to user needs and help reduce errors in the shop by making critical measurements more discernible. Yet another step in making it easier for a user to create and build successful project shapes."

As always, this new release is free to existing program customers via a download from our web site (http://www.segmentedturning.com/upgrdspp.exe) and pricing is adjusted to $40.95 for the installation CD because of accumulated postal increases. Downloaded pricing remains at $36.95
